SUMMARY

QA Software Engineer & Software Project Manager with 4+ years of specialized experience in Android & Web manual testing, test automation, and quality assurance. Proficient in automating processes and optimizing workflows, including AI-driven products. Reduced localization testing cycles by 90% through custom automation frameworks, and successfully delivered 30+ mobile projects for Motorola, currently managing 10+ active projects simultaneously. Proven track record of delivering high-quality software solutions in fast-paced environments.

EXPERIENCE

Project Manager — Roundtable Studio (Contractor for Motorola Mobility)

Dec 2024 – Present · Recife, Brazil

- Orchestrated end-to-end management of 30+ mobile projects, driving project delivery, timelines, and cross-functional collaboration between Marketing, Development, and Localization teams.
- Established and delivered a comprehensive training program for a team of 8 new QA engineers, incorporating onboarding documentation and conducting a week-long hands-on program for localization-related Android testing best practices.
- Proactively managed project risks related to software readiness and resource availability, implementing contingency plans that maintained 100% on-time delivery across all projects.

QA Engineer — Projeto/Cin Motorola

Jun 2022 – Nov 2024 · Recife, Brazil

- Spearheaded Android QA for mobile products, owning the complete testing lifecycle from planning to production release and ensuring zero critical production bugs.
- Developed an automated testing framework using Python and API automation to ensure translation quality for indigenous endangered languages, reducing testing time from 10+ hours to less than 1 hour (90% reduction) while eliminating human errors.
- Drove and took ownership of quality initiatives for AI-based products, designing specialized test strategies for ML-powered features, including accuracy validation across diverse user scenarios, edge case identification, and localization quality assurance across multiple languages.

QA Tester (Intern) — Projeto/Cin Motorola

Aug 2021 – May 2022 · Recife, Brazil

- Validated UI elements on Android, Desktop and Web applications across 50+ languages, verifying text truncation, right-to-left language support, character encoding, and culturally appropriate imagery to ensure compliance with Motorola's localization standards.
- Conducted 20+ comprehensive localization test cycles, including sanity, regression, and exploratory testing, ensuring high-quality releases.
- Optimized testing strategies for responsive web content on mobile devices, significantly improving the user experience across various platforms.

EDUCATION

Bachelor of Computer Engineering — Universidade de Pernambuco (UPE)

Mar 2018 – Aug 2024

- **Thesis:** “Using Computer Vision Techniques to Identify and Classify Mosquito Species” — Advisors: Byron Leite Dantas, Estanislau Baptista Lima
- **Research:** Co-authored the paper “Applying Machine Learning Techniques to Traffic Crash Data on BR 101 in Pernambuco”

SKILLS

- **Mobile Testing:** Android Testing, Mobile Automation, Device Testing, Responsive Design Testing
- **QA Tools & Methods:** Selenium, UiAutomator, JUnit, Jira, Smartsheet, Jenkins, Git, Postman, Regression Testing, Localization Testing
- **Programming:** Python, JavaScript, Java, Kotlin, SQL, Bash, Go

LANGUAGES

- **Portuguese** — Fluent
- **English** — Advanced
